Docket No.: H01.2-9610-US01

TRANSMITTAL LETTER

1. In regard to the above-identified application, we are submitting the attached:
5 pages Amendment in response to the Office Action dated March 14, 2003;
1 page VAS Transmittal Letter; and Return Postcard.
2. With respect to fees:
☒ **No additional fee is required.**
☐ Attached is check(s) in the amount of \$00
☐ Charge additional fee to our Deposit Account No. 22-0350.
3. **CONDITIONAL PETITION FOR EXTENSION OF TIME**
This conditional petition is being filed along with the papers identified in Item 1 above and provides for the possibility that Applicant has inadvertently overlooked the need for a petition and fee for extension of time or for a petition and fee for any other matter petitionable to the Commissioner as required. If any extension of time for the accompanying response is required or if a petition for any other matter is required, by petitioner, Applicant requests that this be considered a petition therefor.
4. Notwithstanding paragraph 2 above, if any additional fees associated with this communication are required and have not otherwise been paid, including any fee associated with the Conditional Petition for Extension of Time, or any request in the accompanying papers for action which requires a fee as a petition to the Commissioner, please charge the additional fees to Deposit Account No. 22-0350. Please charge any additional fees or credit overpayment associated with this communication to the Deposit Account No. 22-0350.

Amendment

This amendment is in response to the office action mailed **March 14, 2003**.

Please amend the application as follows:

In The Claims:

Please replace claim 1 with amended claim 1 as follows:

1. (Twice Amended) A punch for a rotary compression press which has a rotor, the rotor having at least one die bore and at least one guiding bore for the axial guidance of the punch, the punch having a shank received by the guiding bore, key locking mechanism between the guiding bore and the shank preventing rotation of the punch in the guiding bore, the punch further having an insert adapted to engage the die bore for the compression of material in the die bore, the die insert being seated in an end-side bore in a front-end face of the shank and having a trunnion-shaped projection which is seated in the end-side bore and mounted via releasable fastening member, the die insert being biased by a spring toward the front-end face, the insert being adapted to automatically rotate in the end-side bore in a first rotational direction and to be axially
